- ✓ Ability to manage simultaneous campaigns Inbound and Outbound.
- ✓ Simply import the lists and the most common formats: **XLS, XLSX, CSV.**
- ✓ Management of duplicate numbers.
- ✓ Ability to handle private recalls.

WHY CHOOSE SOD CRM?

CRM *Powered by S.O.D.* is an important support tool for their business.

The software allows you to optimize internal processes, prevents the spread of data, allows to gather all the information collected, providing real-time analysis on the progress of work.

Keep in touch with their customers, be notified of a call, make automated calls, are all actions to make better and better and innovative services provided to customers and consolidate the strengths of your company

Incoming calls that are both green numbers, business numbers, or customer service are taken by Sod CRM management system before being distributed. The information, once processed and handled as prescribed, are passed to operators with distribution ACD, or automatic. The operator receives the call and all related information.

SOD CRM is also useful in back office management or for the creation of helpdesk: from technical assistance to marketing campaigns with tool free, advertising on the Internet, trade shows and meetings.

SOD CRM allows you to track every call, improve service and always be close to the customer.

Predictive call

With the predictive module we can maximize the number of calls of the call center and increase worker productivity by reducing the waiting time. The automated call system software allows you to set the number of calls and provide operators only with the successful calls.

When there is a successful call, it is immediately transferred to an operator without delays thanks to the automatic response, when there is a busy signal number or no answer call, the system hangs up and draws the same after a variable time so as to always be in contact at different times.

The Call Predictive Module of SOD CRM, manages the "to call" calls in private and redistributed mode:

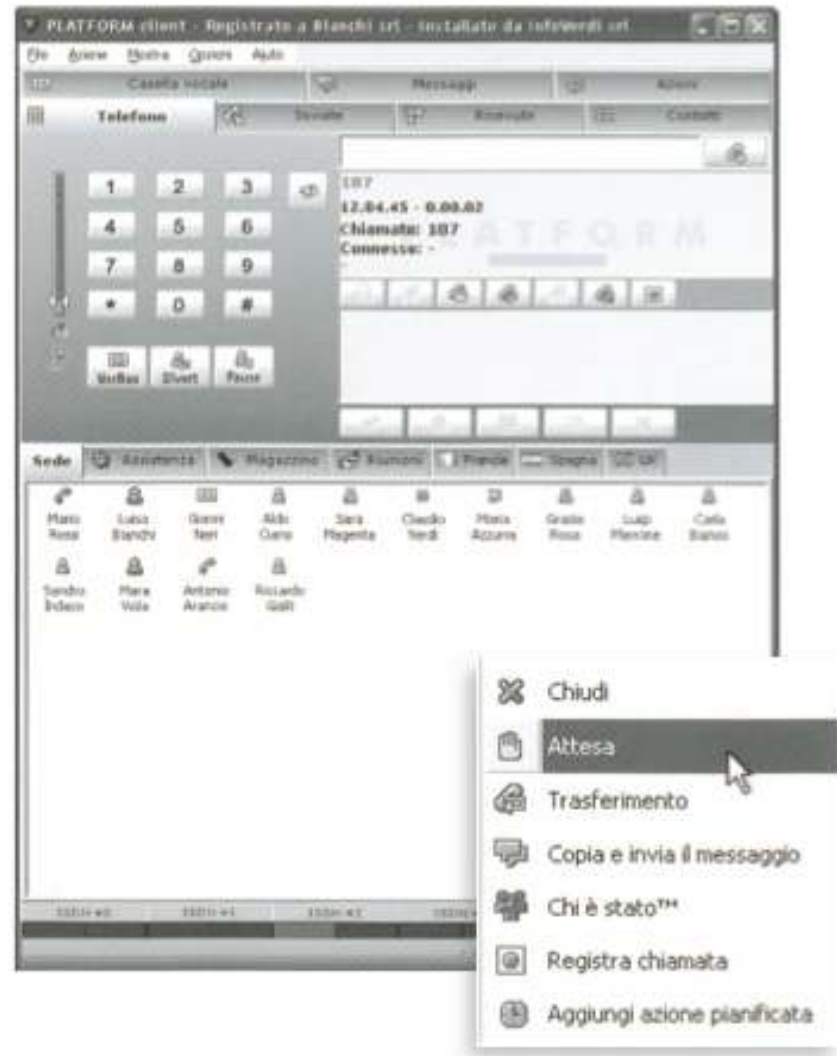

- Private mode: once you set the date and time of call, the name will be repeated only to the operator who had set;
- Redistributed mode: once you set the date and time of contact to call, SOD CRM software will automatically contact the customer.

Telephone Exchange and client VoIP

SOD CRM includes a telephone exchange for any business that allows to manage the phone calls throughout flexibility:

- ✓ User management
- ✓ Group management
- ✓ Telephone lines management
- ✓ Interconnection between exchanges (WAN)
- ✓ IVR management
- ✓ FAX server
- ✓ Client software
