

**CYBERFERO**

**DPO**

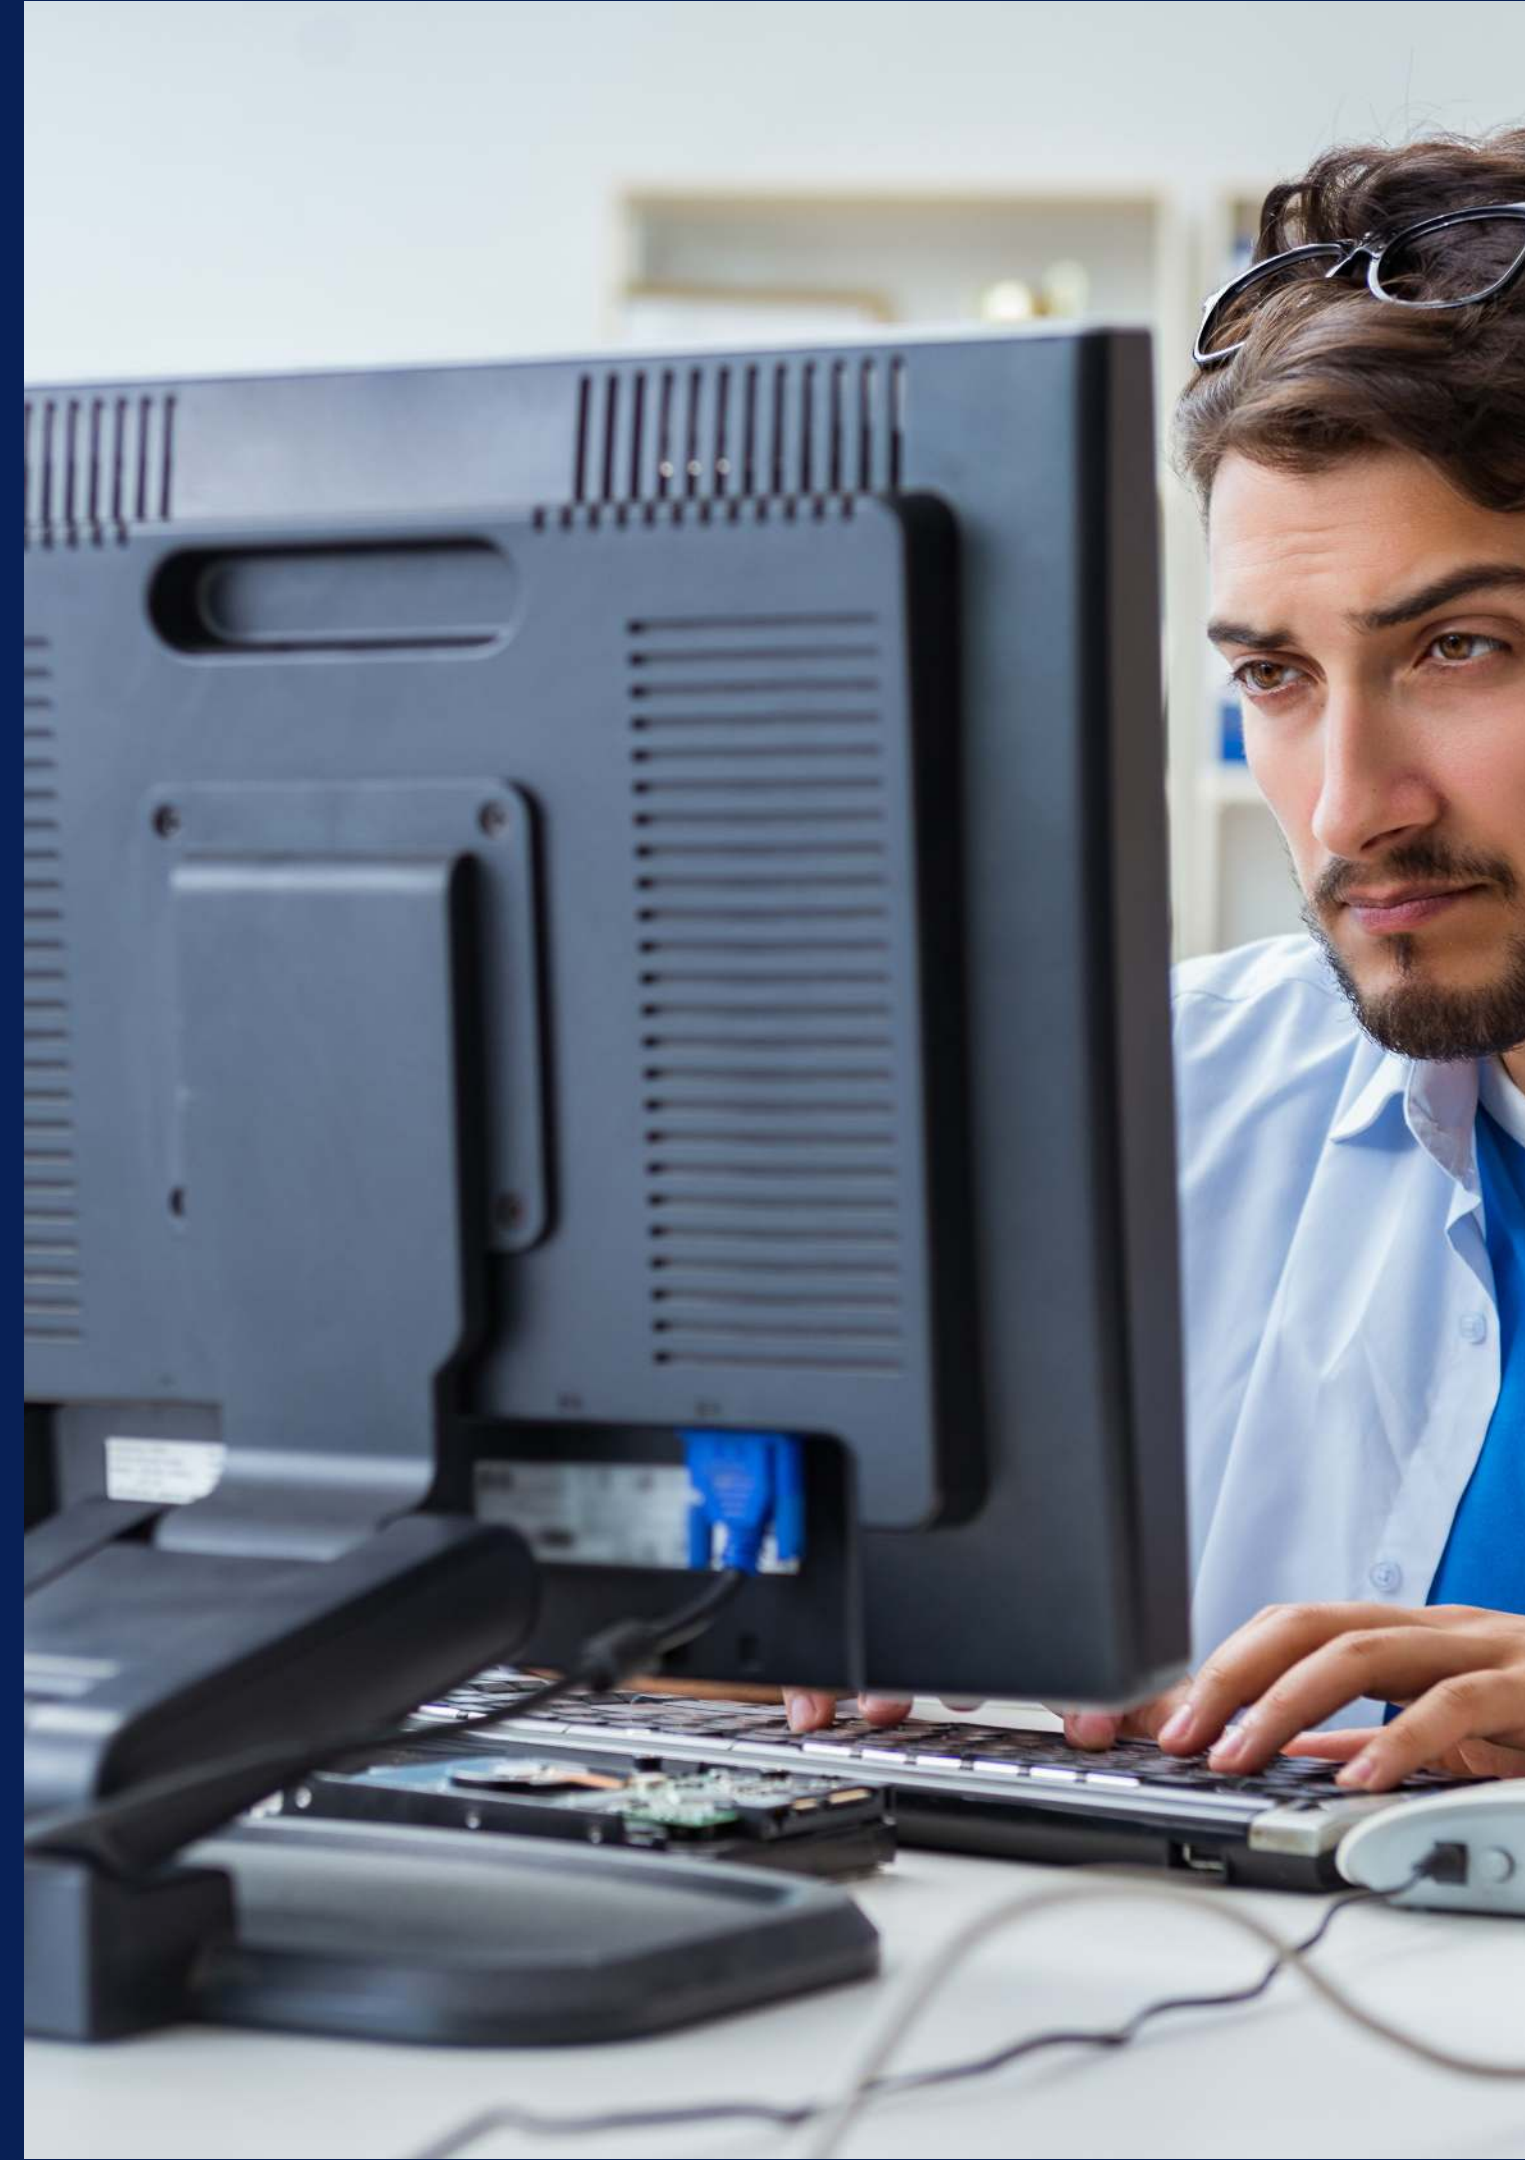

**An external DPO who combines legal,  
technical, and organizational skills for GDPR  
compliance.**

[www.cyberfero.com](http://www.cyberfero.com)

# WHAT IS IT?

The DPO (or data protection officer) is a key figure established by the European regulation. In the presence of certain requirements (public administrations, large-scale processing, special categories of data, systematic monitoring), the designation is mandatory.

- ✓ Continuous compliance monitoring
- ✓ Audit and staff training
- ✓ Support on d pia and data breach
- ✓ Point of contact with guarantor and interested parties

# GDPR

# WHAT DOES A DPO DO?

- 01 Translates GDPR requirements into operational decisions
- 02 Check that policies and processes are actually applied
- 03 Reduces the risk of fines, accidents and improvised emergency management
- 04 Create continuity: not one-off interventions, but constant governance

# TASK OF THE DPO

**Our service covers the duties of the role, including:**

- ✓ **Monitor compliance** with GDPR and national/EU regulations, including internal accountability, audits, awareness raising and training
- ✓ **Provide opinions** on impact assessments (d pia) and monitor their implementation
- ✓ **Cooperate with the guarantor** and manage discussions on privacy issues
- ✓ **Act as a point of contact** for treatment-related issues
- ✓ Support the updating of the **processing register** and the application of principles (privacy by design/by default, transparency, adequate security measures, data breach management)

# UPON REQUEST, WE CAN ALSO:

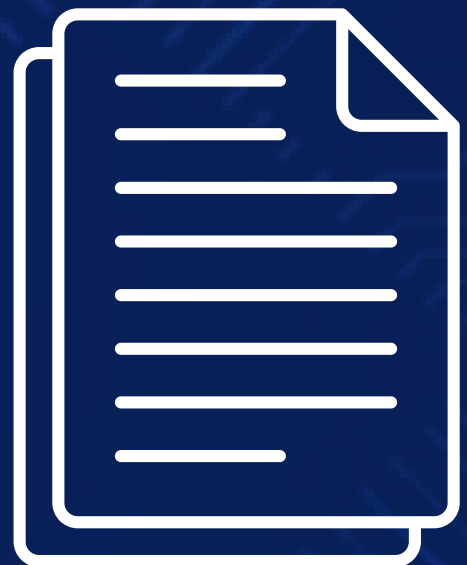

1) Assist in the preparation of documentation for notifications/communications in the event of violations

2) Perform periodic verification audits and improvement plans

3) Structure a continuous training program for authorized/designated personnel

## INDEPENDENCE AND ABSENCE OF CONFLICT

The DPO operates autonomously and independently, free of conflicts of interest, with direct access to the organizational leadership, ensuring the credibility of the role and the effective effectiveness of the organization.

# WHY CYBERFERO?

A "Data Protection Office", not a single person

The service is provided by a team that integrates:

- Legal skills (regulatory interpretation, contracts, relations with guarantors)
- Technical skills (security measures, ICT processes, incident response)
- Organizational skills (processes, roles, responsibilities, training)

# WHAT DO WE OFFER?

- ✓ Onboarding and initial analysis (treatments, roles, main risks)
- ✓ Annual DPO activity plan (audits, priorities, training)
- ✓ Periodic and verbal reports (evidence + recommended actions)
- ✓ Operational support for requests from interested parties, data breaches, and PIA
- ✓ Dedicated contact channel for internal questions and requests

# DESIGNED FOR:

- 01 Public bodies and associated companies
- 02 Companies that process large-scale data or sensitive data
- 03 Groups with multiple locations, structured HR, marketing/CRM, healthcare, education, citizen services
- 04 Organizations that want a “present” DPO, not just a formal one

# CYBERFERO

**For over 10 years a leader in the Cybersecurity and Security sector**

Cyberfero is a Managed Security Service Provider (MSSP) specializing in providing comprehensive security solutions for businesses of all sizes. As a trusted partner, we offer a broad range of security services designed to protect your organization from cyber threats, data breaches and other security risks.
