

**CYBERFERO**

# Service of early warning & advisory monitoring

**Selected, relevant, and timely  
security alerts. Before they  
become an emergency.**

[www.cyberfero.com](http://www.cyberfero.com)

# HOW DOES IT WORK?

The service continuously monitors the main institutional sources and vendors (e.g., CSIRT Italia, CertFi N, Fortinet, Cisco, Microsoft, and others), intercepting advisories and bulletins even in the initial stages, when information is emerging and no consolidated patches or CVEs exist yet.

- 01 Continuous multi-source monitoring
- 02 Filtered alerts on relevant assets and vendors
- 03 Filtered alerts on relevant assets and vendors
- 04 Dashboard + periodic reports

# WHY IS IT NEEDED?

Today, the problem isn't a lack of information: it's too much. Advisories, bulletins, mailing lists, technical blogs, and vendor communications generate a constant flow, often redundant and difficult to read.

**Result:**

- Time is wasted "reading everything"
- There is a risk of underestimating a truly critical alert
- We intervene late, when the vulnerability has already been exploited or becomes urgent

**Early warning means reducing the time between "signal" and "decision", with information already contextualized.**

# WHAT IS THE SERVICE?

Early warning & advisory monitoring is a proactive system that:

- ✓ Automatically collects advisories and bulletins from selected sources
- ✓ Normalize information (into a consistent and comparable format)
- ✓ Filter and prioritize based on vendors, products, and assets of customer interest
- ✓ Send notifications only when needed, with reporting and tracking

**This isn't a press review. It's an operational tool that helps IT and security teams make quick and informed decisions.**

# HOW DOES IT WORK?

## 1) Initial setup

- ✓ Definition of sources and vendors to monitor
- ✓ Mapping assets/products in the perimeter (what you really care about)
- ✓ Define filter rules, severity and notification channels

## 3) notification and integration

- We produce evidence on:
- ✓ Immediate email alerts (dedicated channel)
  - ✓ Or integration with siem/soar for workflow and ticketing
  - ✓ Ability to set thresholds (high/critical only, or even medium on critical assets)

## 2) continuous monitoring

- ✓ Definition of sources and vendors to monitor Mapping of assets/products within the perimeter (what really interests you)
- ✓ Continuous updates on new evidence, changes and follow-ups

## 4) reporting and governance

- ✓ Weekly or monthly summary of relevant threats
- ✓ Trends and recurrences (most exposed vendors, recurring themes, areas to strengthen)
- ✓ Access to dashboards to view and manage advisories

# WHAT INCLUDE?

# WHAT DO YOU GET IT?

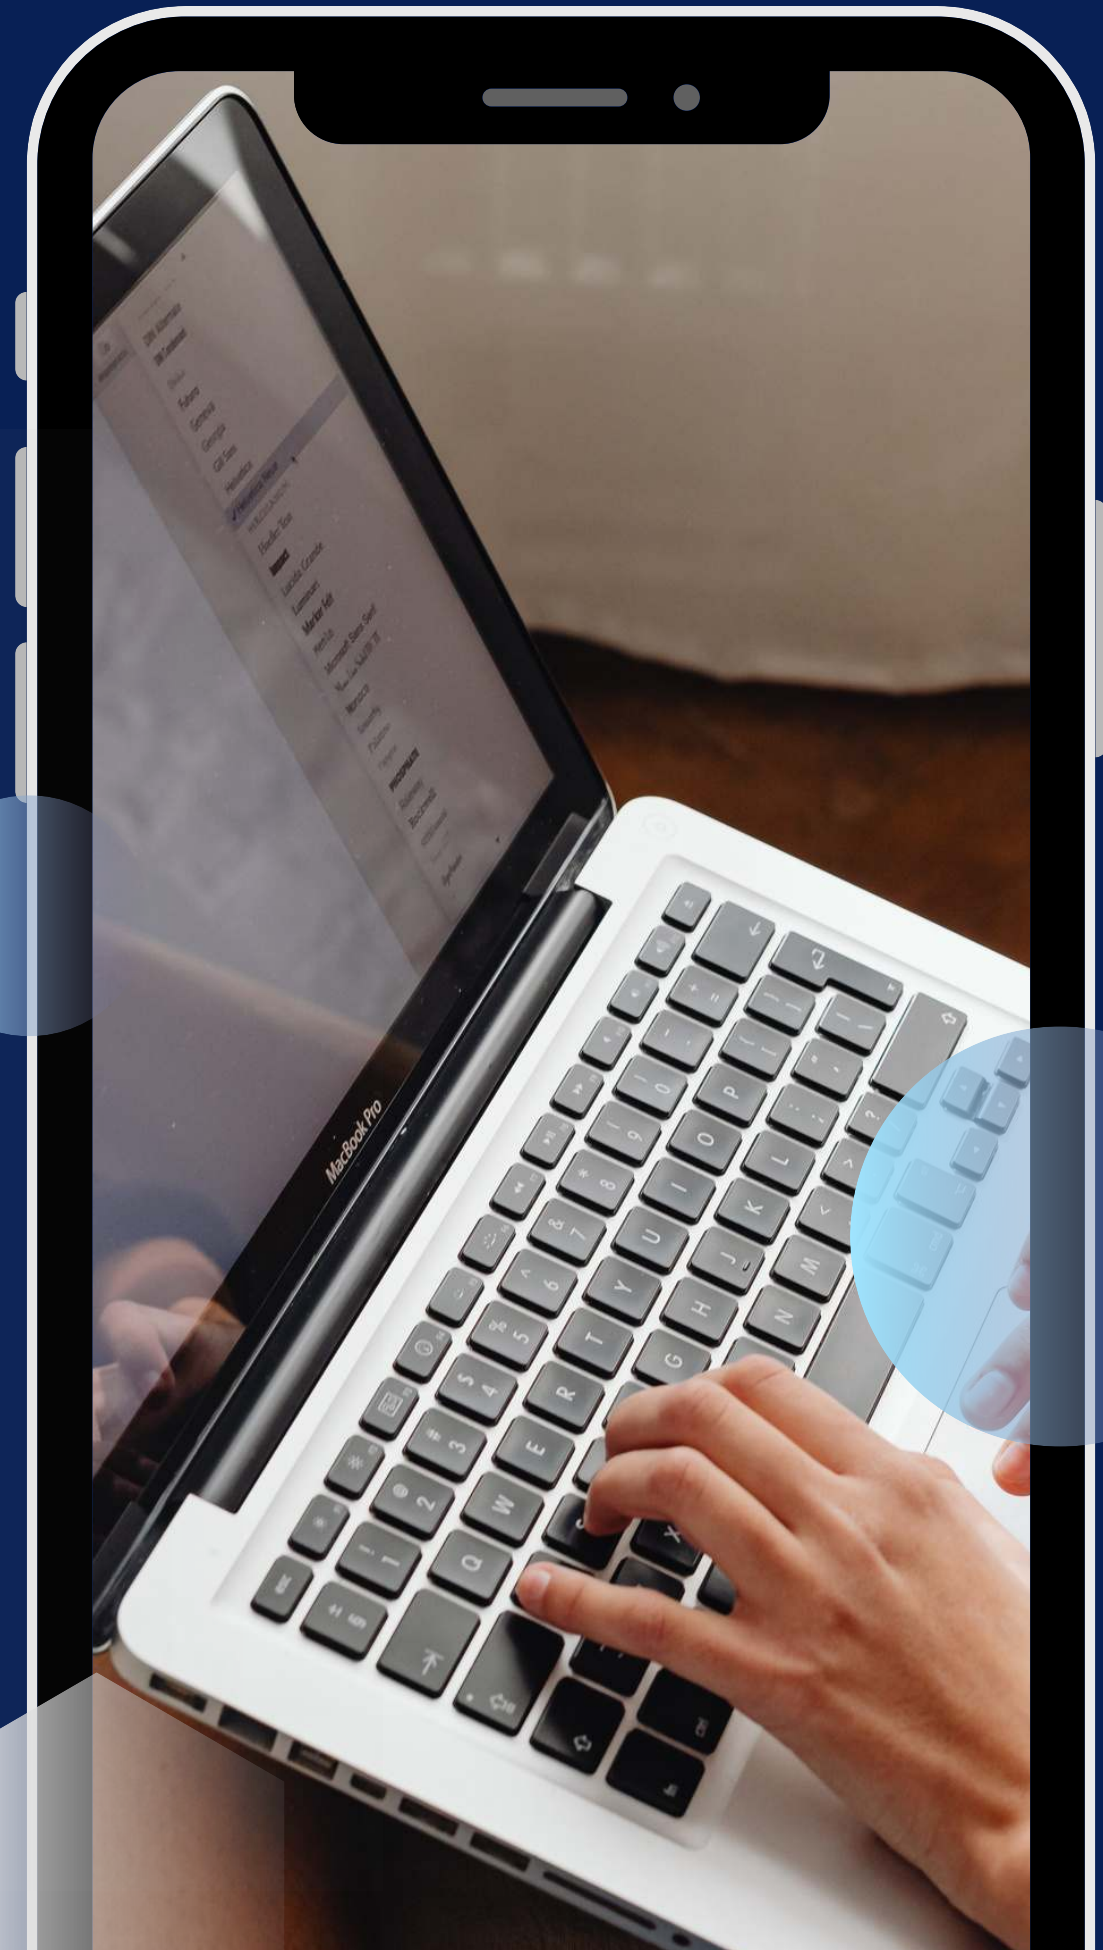

- ✓ Feed configuration and asset mapping
- ✓ Continuous multi-source and multi-vendor monitoring
- ✓ Dedicated and customizable notifications
- ✓ Periodic reports (weekly or monthly)
- ✓ Dynamic management: adding/removing vendors and sources
- ✓ Dashboard for consultation and advisory management

- ✓ Advance decision making on vulnerabilities and emerging risks
- ✓ Clearer priorities on what to evaluate first (based on your asset portfolio)
- ✓ Support IT and security teams in reducing risk exposure, without chasing emergencies

# WHO IS IT AIMED AT?

This service is suitable for:

- 01 Companies with multiple vendors and technologies in use (infrastructure, cloud, security, collaboration)
- 02 IT managers and security managers who need to make quick and documentable decisions
- 03 Businesses that want continuous support without overloading the internal team
- 04 Organizations that integrate vulnerability management, patching, and incident response
- 05 Organizations subject to the NIS2 Directive that must ensure continuous threat monitoring, proactive risk management, and documentable cyber decision-making

# CYBERFERO

**For over 10 years a leader in the Cybersecurity and Security sector**

Cyberfero is a Managed Security Service Provider (MSSP) specializing in providing comprehensive security solutions for businesses of all sizes. As a trusted partner, we offer a broad range of security services designed to protect your organization from cyber threats, data breaches and other security risks.
